Ajay Engineering

<http://www.ajayengineeringindia.com/>

We are engaged in manufacturing and supplying a comprehensive assortment of Chemical Process Products like Process Reactor, Vacuum Dryer and Chemical Plants etc.

About Us

Ajay Engineering was founded in **2007** with a dream to become the most promising Manufacturer and Supplier of best in class Chemical Process Products. After eight successful years of operating, today we are capable to manage a broadened product portfolio that includes next generation process products such as, Process Reactor, Vacuum Dryer, and Chemical Plants. Our mission of becoming the industry leader can be recognized by reckoning the beneficial features that are furnished by our offered range of products. Owing to the precision engineered design, rugged construction, superior performance and longer service life of our offered process equipments; we have become synonymous to trust for a large number of prestigious clients in India.

Since the past eight years, we have learned a lot and evolved as a pioneering entity by implementing greater amount of innovation in our production capabilities. Besides, the ambitious efforts of our team members make us accountable to deliver excellence that is being reviewed multiple times during the in-house and external testing phases. Further, our offered products and equipments are cherished by lots of businesses around the country, including pharmaceutical, chemical and petrochemical, adhesives, resins, dyes, and paint industries. Due to the technological advancements and our adeptness to immerse up in achieving the desired operational excellence, our process machinery is needed more than ever.
